*“Problems are merely challenges to
overcome”*

A 20 day programme (plus two tutorial days), which leads to an accredited qualification, aims to give practising and potential senior managers the foundation for their formal development by assisting delegates to obtain both the knowledge and skills required at a senior management level. The course considers policy and procedures and how they translate to operational management. Participants will derive most benefit from the programme if they have some prior experience of management – usually at a middle management level, and must have previously studied aspects of management, although a formal management qualification is not essential.
